Dose-response from the melanoma prototype (mean and 95% CI over trajectories)
PN (pigment network)
BWV (blue whitish veil)
VS (vascular structures)
Pig (pigmentation)
Str (streaks)
D/G (dots and globules)
Reg (regression structures)
Evaluator output (SD units from the real benign mean)
Commanded concept level
CBM-A (made the pseudo-labels)
CBM-B (independent architecture)
ISIC 2018 detector (independent data)
Lesion darkness (non-learned)
